The United States Nuclear Regulatory Commission (the Commission) has issued Amendment No. 28 to Facility Operating License No. NPF-3, issued to The Toledo Edison Company and The Cleveland Electric Illuminating Company (the licensees), which revised Technical Specifications for operation of the Davis-Besse Nuclear Power Station, Unit No. 1 (the facility) located in Ottawa County, Ohio. The amendment is effective as of its date of issuance.

This amendment deletes certain satisfied Appendix B Environmental Technical Specifications related to studies on fish, fish eggs, and larvae.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

This action involves changes to environmental monitoring programs and does not involve any change in plant design or operation or an increase in effluent types or quantities. The impact of the overall plant has already been predicted and described in the Commission's Final Environmental Statement for the facility dated October 1975.
