Mr. Walter G. Martin, Chief
Safeguards Branch
U S Nuclear Regulatory Commission
Region I
631 Park Avenue
King of Prussia, Pennsylvania 19406

Reference: 1) License No. SNM 368
2) Docket No. 70-371
3) Inspection No. 80-06

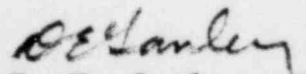

Dear Mr. Martin:

This is in response to your letter of May 20, 1980, in which you requested we respond to you regarding a commitment to establish a written procedure to insure that all sludge generated within an inventory period would be considered in the LEID calculation. There were no items of non-compliance observed during Inspection 80-06.

The attached form represents the procedure implemented 4/18/80 to record generated bottles of sludge and filters and make a comparison against U-235 sectioned to insure all sludge generated during the inventory period is considered in the LEID calculation. This form was tested for the inventory period ending 5/16/80 and found to be acceptable for sludges, filters and machine chips.

Please contact me should you have questions or comments concerning this reply.

Very truly yours,

D. E. Ganley
President
