UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

MAY 8 1980

MEMORANDUM FOR: G. W. Knighton, Chief, Research and Standards Coordination
                Branch, DST

FROM: W. R. Butler, Chief, Containment Systems Branch, DSI

SUBJECT: DSI COMMENTS ON ANSI/ANS 56.2

In response to W. M. Morrison's memorandum dated April 17, 1980, the Contain-
ment Systems Branch, Division of Systems Integration has reviewed draft ANSI/
ANS 56.2, "Containment Isolation Provisions for Fluid Systems," dated Janu-
ary 28, 1980. With regard to ballot action on the standard, we recommend
APPROVE with comments; our comments are those being forwarded to the working
group by Guy A. Arlotto.

In addition, we have two comments regarding the proposed Regulatory Guide 1.141,
"Containment Isolation Provisions for Fluid Systems," Revision 1, May, 1980:

1. The proposed Regulatory Guide 1.141, Revision 1, dated May 1980, references
    the June 1976 version of the standard. We recommend that the Regulatory
    Guide be updated to reflect the latest version of ANSI/ANS 56.2, when the
    standard is formally approved.

2. The Implementation section states that all operating reactors must be
    capable of isolating containment upon a high radiation signal by Janu-
    ary 1, 1981. Revision 3 of the TMI task action plan (NUREG-0660) does
    not provide a date for this requirement. The appropriateness and bases
    for this date should be reviewed.

                                    Walter R. Butler

                                    Walter R. Butler, Chief
                                    Containment Systems Branch
                                    Division of Systems Integration
