Mr. Darrell Eisenhut
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Eisenhut:

May we please receive a copy of your letter dated ²⁵~~24~~ April 1980 to all of the utility companies updating the requirements for the Emergency Response Facilities, especially the Technical Support Center?

Can you tell me if any power plants other than Yankee Rowe have received approval to use closed-circuit television as the communication link between the Control Room and Technical Support Center? We would like to contact those plants for information about their installation.

Thank you for your assistance.

Very truly yours,

Albert E. Hickey
