5 May 80

Hon. Richard T. Kennedy
Commissioner
U.S. Nuclear Regulatory Commission

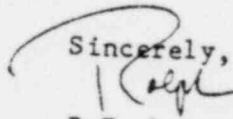

Dear Dick:

Your March 27th "Energy" speech at Brown is excellent. Some of the things you stressed needed saying. My impression is that realisms are starting to insinuate themselves into U.S. energy consciousness. If nothing else the dollar cost of Btus is getting to the public.

I thought that you might like to see my work-up of material dealing with the Utah cancer claims.

Incidentally, since we talked last the Najarian contention of excess leukemia at the Portsmouth Naval Shipyard has been disproven by Johns Hopkins. A proportionate mortality study showed no excess leukemia deaths among the nuclear workers.

Sincerely,

R.E. Lapp
