Joseph Hendrie, Chairman  
Nuclear Regulatory Commission  
NATOMIC Building  
1717 H Street N. W.  
Washington, D. C. 20555

Dear Mr. Hendrie:

At last month's annual business meeting of the Association of American Geographers in Louisville, Kentucky, the membership in attendance passed by voice vote the following resolution.

"Be it resolved that the Association of American Geographers advocates an energy economy for the United States based upon conservation, energy efficiency, and renewable resources and as rapid a transition as is feasible to such an economy from our present dependence upon domestic and imported fossil fuels and upon nuclear power."

This resolution is to be transmitted "to the President of the United States, the National Academy of Sciences, the cognizant committees of Congress, the Secretary for Energy, the Director of the National Science Foundation, and appropriate news media."

Sincerely,

*Handwritten signature: Patricia J. McWathy*
