Office of Nuclear Reactor Regulation
US Nuclear Regulatory Commission
Washington, DC 20555

Dear Staff:

I have received my copy of NUREG-0662 Vol. 11. On April 11 I sent my written response to NUREG-0662 and the Krypton venting; the format of my response was telegram because I only received on April 11 the "News Releases" (weekly, from NRC) that announced public input was wanted by April 11. I called Karl Abrahms in King of Prussia, PA, as I had that number in hand. He said I could get it in via telegram. So I spent \$20.00+ to mail a telegram. My response, without seeing the draft study yet, was to be wary of health effect studies done by Argonne National Laboratory, also to be critical of using the ALARA policy without spelling out what it means. Both of these criticisms I could make without seeing the draft study, which your very brief time-allowance didn't allow me to see by April 11.

My point now is that for all my spending a precious \$20.00+ on giving you more public input, my telegram does not appear in NUREG-0662. Why not? And are other critical letters omitted?

Sincerely,

Lynn R. Chong
