Re: University of Notre Dame
Amendment Application of
License SUD-197

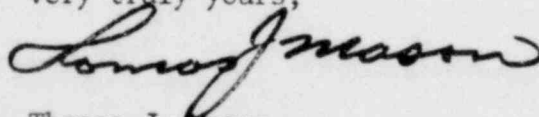

Dear Mr. Lamastra:

This is a request to amend our Source Material License, SUD-197, concerning condition No. 14. In our recent renewal application dated February 15, 1980, Item No. 12 refers to procedures submitted in support of application dated April 25, 1958 which commits us to six month leak testing of our source material.

We request that this leak testing condition as listed in application dated April 25, 1958 with amendment requests dated December 21, 1961 by Dr. Norman R. Gay, Dean, College of Engineering, be deleted from our license as 10 CFR 40 does not require leak testing of source material.

Your consideration of this request will be greatly appreciated.

Very truly yours,

Thomas J. Mason
Vice President - Business Affairs
