## PREFACE

### Standard Distribution for Unclassified U.S. Nuclear Regulatory Commission Publications

The Nuclear Regulatory Commission, Division of Technical Information and Document Control, in conjunction with other NRC program offices, establishes and maintains standard lists for the distribution of regulatory and technical reports prepared by NRC staff and contractors. This document describes current distribution categories and lists the recipients of documents published in each category. Standard distribution lists will be revised periodically as the need arises.

Eligibility for inclusion on standard distribution lists is generally limited to those with a need for the specific information. Requests for additions or changes to these distribution lists should be sent to the:

Distribution Services Branch  
Division of Technical Information  
and Document Control  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Most reports distributed in accordance with these standard distribution lists are available from:

National Technical Information Service  
Springfield, Virginia 22161

or:

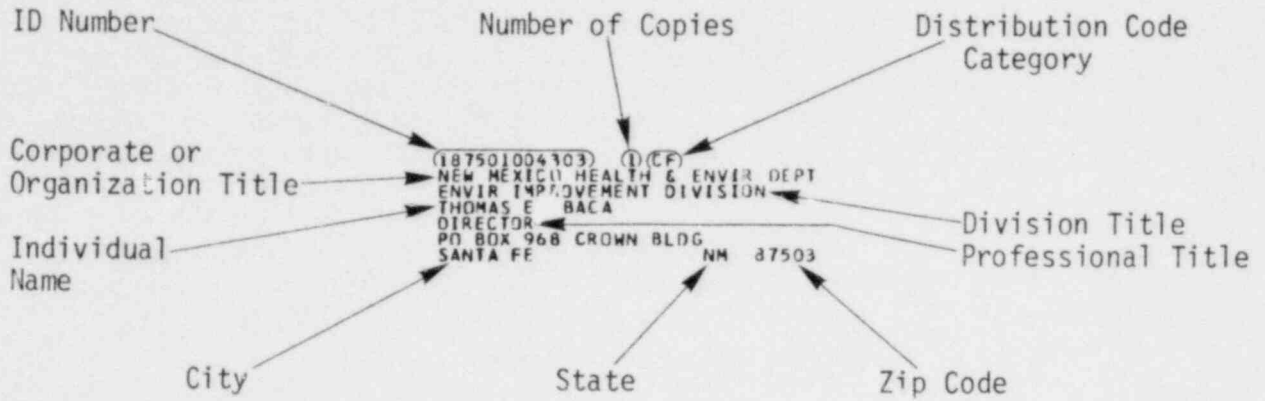

Public Document Room  
U.S. Nuclear Regulatory Commission  
H Street Lobby  
Washington, D.C. 20555

Draft or "For Comment" NUREG reports are available from the U.S. NRC. See "U.S. NRC Publications" (NUREG-0304) for a listing of available NUREG reports.

Home addresses of private individuals are not included in this printed version of the NRC standard distribution categories and lists. These addresses have NOT been removed from the various distribution lists, but in accordance with the provisions of the Privacy Act of 1974 are not shown in this document.

## How to Read Label

Each document distributed by one of these lists is affixed with a computerized mailing label. Information contained on this label is important when addressing inquiries to the Distribution Services Branch.

CODE: AL

DESCRIPTION: Law Digest (NUREG-0386). USNRC Staff Practice and Procedure Digest and Quarterly supplements to the Digest.

The Practice and Procedure Digest contains a Digest of Commission, ASLAB, and ASLB decisions interpreting or applying the Rules of Practice (10 CFR Part 2).

DISTRIBUTION ELIGIBILITY: NRC Commissioners, heads of Offices legal offices (OGC & OELD), ASLAP, ASLB, and ACRS. Members of the NRC technical staff who may have need for the digest will be approved on an individual basis.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 105

CODE: CY

DESCRIPTION: Agreement States

Agreement States are those states which have signed Agreements with NRC. NRC relinquishes to the states regulatory authority over certain radioactive materials. Distribution of NRC documents to all Agreement States is handled by the Office of State Programs: Agreement State Program.

DISTRIBUTION ELIGIBILITY: Limited to authorized representatives.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 45

CODE: NB

DESCRIPTION: Yellow Book/Construction Status Report

The Yellow Book contains detailed information on the status of all nuclear power plants under construction, and allows the Office of Nuclear Reactor Regulation to use any slack time created by changes in construction schedule. This information also serves the Inspection and Enforcement headquarters and regional offices.

DISTRIBUTION ELIGIBILITY: Available to relevant utilities and NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 668

CODE: NG

DESCRIPTION: Buff Book I/Status Summary Report, Water Reactor  
Safety Research

Buff Book I is basically an internal management document for monitoring progress and dollar expenditures on all water reactor safety research sponsored by NRC.

DISTRIBUTION ELIGIBILITY: Available internally to relevant  
NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 497

# Status Summary Report, Water Reactor Safety Research (Buff Book I)

CODE: NL

DESCRIPTION: Effluent Reports

These reports contain data on the releases of radioactive materials in airborne and liquid effluents from commercial light water reactors during the year. Data on solid waste shipments as well as selected operating information are also included. These reports supplement earlier annual reports issued by the former Atomic Energy Commission and the Nuclear Regulatory Commission.

DISTRIBUTION ELIGIBILITY: Internal distribution includes assistant directors and above and relevant branches. External distribution is made to utilities, architect/engineers, consultants and libraries.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 35

CODE: NR

DESCRIPTION: Occupational Radiation Exposure Report

This annual report summarizes the personnel exposure information that is reported to NRC pursuant to 10 CFR 20.405, 20.407 and 20.408. It presents the annual exposures, in terms of averages and total man-remS incurred by four categories of NRC licensees (power reactors, industrial radiographs, fuel fabrication and processing plants, and distributors of by-product material). It also includes statistical information on workers who have terminated employment during the year and on overexposures.

DISTRIBUTION ELIGIBILITY: Branch chiefs and above on request. Licensees contributing information, other agencies and organizations, i.e. labor unions, having an interest in radiation exposure.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 234

CODE: RA (6A)

DESCRIPTION: Water Reactor Safety Research  
Site Safety Research

Reports in this category which are given additional distribution on RA (6A) include information on: effects of geologic and seismologic phenomena on power plant siting, as well as structural and foundation engineering, and evaluations of novel siting concepts such as floating and underground.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 353

CODE: RB (6B)

DESCRIPTION: Water Reactor Safety Research  
Site Safety Research

Reports in this category which are given additional distribution on RB (6B) include information on the effects of meteorological and hydrological phenomena on power plant siting.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 233

CODE: RC

DESCRIPTION: Criticality

Reports in this category include information on all analyses and testing related to nuclear criticality. These include: (1) experiments and analyses related to storage and shipment of reactor fuels, both unirradiated fuel and spent fuel; (2) experiments and analyses related to all aspects of the fuel cycle such as fuel fabrication and reprocessing plants; (3) development of computer programs for analysis of nuclear criticality and comparisons of results of these codes with experimental data; and (4) development of cross-section data useful to nuclear criticality analyses.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 172

# Criticality

CODE: RE

DESCRIPTION: Environmental Research

Reports in this category include information on: studies on the technical aspects of NRC health and environmental policies and programs; development of improved methods and procedures for licensing review, inspection, and enforcement; and studies leading to improved regulations and guides to assure effective health and environmental implementation at licensed facilities.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 119

CODE: RH

DESCRIPTION: Health Safety Research

Reports in this category include information on: studies on the technical aspects of NRC health and environmental policies and programs; development of improved methods and procedures for licensing review, inspection and enforcement; and studies leading to improved regulations and guides to assure effective health and environmental implementation at licensed facilities.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 76

CODE: RI

DESCRIPTION: The Effects of Pressure Pulses on Ventilation System Components Used in Fuel Cycle Facilities

Research is being performed to determine the effects of pressure pulses, including design tornado transients, on the ventilation system components used in fuel cycle facilities. HEPA filters, blowers and dampers are tested under transient conditions to determine response characteristics, especially structural integrity and particulate transmission by full-sized HEPA filters. Total ventilation system response is determined with the TVENT computer code.

DISTRIBUTION ELIGIBILITY: Component vendors, fuel fabricators, waste processing fabricators, appropriate licensees and relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 103

DESCRIPTION: Mechanical Engineering Research  
Branch Reports

Reports in this category include information on experiments and analysis of the engineering and structural behavior reactors, systems, components and equipment; the development and application of criteria for equipment qualification and testing methodology; and the establishment of a supporting data base for standards developed and other research sponsored by the Branch.

DISTRIBUTION ELIGIBILITY: Contributing contractors, Nuclear Steam System Supply vendors, selected utilities, licensees and architect/engineers, interested Federal agencies, national and independent laboratories and research Institutes, selected universities and consultants, ACRS members and internal NRC distribution.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 184

CODE: RN

DESCRIPTION: Mechanical Engineering Research Branch Reports -  
Structural and Engineering Mechanics

Reports in this category are essentially analytical and associated with structures and engineering mechanics.

DISTRIBUTION ELIGIBILITY: Contributing contractors, Nuclear Stream System Supply vendors, selected utilities, licensees and architect/engineers, interested Federal agencies, national and independent laboratories and research Institutes, selected universities and consultants, ACRS members and internal NRC distribution.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 194

CODE: RO

DESCRIPTION: Mechanical Engineering Branch Reports -  
Testing, Experiments and Systems

Reports in this category are primarily associated with testing, experimentation, and operation or function of systems, components and equipment.

DISTRIBUTION ELIGIBILITY: Contributing contractors, Nuclear Stream System Supply vendors, selected utilities, licensees and architect/engineers, interested Federal agencies, national and independent laboratories and research Institutes, selected universities and consultants, ACRS members and internal NRC distribution.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 185

1990 N CALIFORNIA BLVD  
STE 202  
WALNUT CREEK CA 94596

CODE: RP

DESCRIPTION: Water Reactor Safety Research  
Fire Protection Research

Reports in this category include information on fire protection research applicable to nuclear power plants. Specifically covered are: cable tray fire testing; testing of cable coatings, barriers, and fire stops; testing of extinguishing systems; smoke and fire detection systems; and evaluation of fire protection standards and regulatory guides. Also covered are analytical studies in the above areas.

This list is to be used in conjunction with R1, Water Reactor Safety Research Basic List.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 131

CODE: RQ

DESCRIPTION: Charcoal Research

Research is being performed to determine the effects of atmospheric pollutants on the adsorption capabilities of activated charcoal. These charcoals are used in nuclear plants to adsorb fission products in the gaseous state. Reports in this category provide results from experimental projects studying charcoal degradation.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 198

CODE: RR

DESCRIPTION: Effluent and Radiation Field Source Terms  
in Operating Reactors

Reports in this category include information on all testing in operating nuclear power plants to determine (1) the radioisotope content of liquid and gaseous streams within the plant and the performance of plant equipment for evaluation of analysis methods used for determining nuclear plant effluents, and (2) source terms and radiation fields associated with plant components and the cubicles within which they are contained for evaluation of current analysis approaches.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC  
offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 189

CODE: RS

DESCRIPTION: safeguards Research Reports

Reports in this category include information on: studies on the technical aspects of NRC safeguards policies and programs; development of improved methods and procedures for licensing review, inspection and enforcement; and studies leading to improved regulations and guides to assure effective safeguards implementation at licensed facilities.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 193

CODE: RT

DESCRIPTION: Transportation Safety Research

Reports in this category include information on: general transportation operations and studies, analyses which define the transportation environments, tests to confirm the capabilities and response of shipping containers to normal and abnormal transport environments, evaluations of the effectiveness of emergency planning and response to transport accidents, and studies which estimate and evaluations which compare the degree of safety achieved by alternate transport methods and procedures. Includes all transportation related confirmatory research work sponsored by the Division of Safeguards, Fuel Cycle and Environmental Research.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 195

CODE: RW

DESCRIPTION: Waste Management

This category covers research related to waste treatment systems performance, waste product characteristics, including packaging, and the development and verification of radionuclide transport models associated with waste disposal activities.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 225

CODE: R1

DESCRIPTION: Water Reactor Safety Research Basic List

Reports in this category include information on: safety research applicable to water moderated and cooled nuclear reactors in the area of test and development of safety experimental facilities, components and instrumentation, facility operations, studies of accident probabilities and consequences, and program planning reports.

All Water Reactor Safety Research reports are to be distributed in accordance with the basic address list R1, with additional distribution as appropriate to supplemental lists.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 190

CODE: R2

DESCRIPTION: Water Reactor Safety Research  
Systems Engineering

Reports in this category include information on: experiments and analyses of reactor accident phenomena representative of the separate and combined effects of accident behavior as postulated in the safety analysis of full scale reactor plants. Generally includes large scale experiments, e.g., blowdown heat transfer with full scale heater assemblies, reactor system modeling experiments such as Semiscale, experiments in the LOFT facility, experiments on ECC bypass and other research sponsored by the Systems Engineering Branch.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC  
Offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 279

CODE: R3

DESCRIPTION: Water Reactor Safety Research Fuel Behavior

Reports in this category include information on experiments and analyses of nuclear reactor fuel and clad behavior under postulated reactor accident conditions. Includes studies of Zircaloy and  $UO_2$  properties, fission product release and transport, fuel stored heat, core meltdown studies, fuel behavior codes, and plutonium recycle fuel studies. Includes experiments at the Power Burst Facility and in the Halden Reactor. Fuel studies in this category include all research programs sponsored by the Fuel Behavior Research Branch.

DISTRIBUTION ELIGIBILITY: Available to relevant MRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 287

CODE: R4

DESCRIPTION: Water Reactor Safety Research  
Analysis Development

Reports in this category include information on: the development, verification, and application of analysis methods and codes for calculating postulated reactor and nuclear facility accident behavior. Includes nuclear system analysis codes and component codes, which are developed for the analysis of a wide spectrum of accident levels and types including for example: fluid dynamics and fuel behavior during hypothetical loss of coolant, reactivity transient, or anticipated transient without scram accidents. Includes research work sponsored by the Analysis Development Branch.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC  
offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 285

CODE: R5

DESCRIPTION: Water Reactor Safety Research  
Metallurgy and Materials

Reports in this category include information on: experiments and analyses of nuclear reactor primary system materials, components, and system models under loads (mechanical and environmental) representing behavior under operating and postulated accident conditions in water moderated and cooled nuclear reactors. Includes the development and application of criteria, analytical methods, and design codes and other research sponsored by the Metallurgy and Materials Research Branch.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 265

DESCRIPTION: Water Reactor Safety Research  
Site Safety Research

Reports in this category include information on: effects of geologic and seismologic, meteorologic and hydrologic phenomena on power plant siting, as well as structural and foundation engineering, and evaluations of novel siting concepts such as floating and underground.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 112

DESCRIPTION: Advanced Reactor Safety Research  
Fast Reactors

Reports in this category include information on: safety research; tests and development of safety related instrumentation, components and facilities; reactor operations; analysis development and application to studies of postulated accident sequences and consequences related to sodium cooled fast nuclear reactors. Includes all fast reactor safety research work sponsored by the Office for Advanced Reactor Safety Research, Division of Reactor Safety Research.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 257

CODE: R8

DESCRIPTION: Advanced Reactor Safety Research  
Gas Cooled Reactors

Reports in this category include information on: safety research on coated particle fuel, fission product behavior, graphite oxidation, structure analysis and evaluation, material property studies, safety instrumentation and control, accident analysis and delineation, proof test experiments related to gas cooled reactors (high temperature, thermal). Includes all gas cooled reactor safety research work sponsored by the Office for Advanced Reactor Safety Research, Division of Reactor Safety Research.

DISTRIBUTION ELIGIBILITY: Available to relevant NRC  
offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 223

DESCRIPTION: Standard Technical Specifications

These reports are generic documents for use in the licensing process of boiling water and pressurized water reactors. They set forth the limits, operating conditions and other requirements applicable to nuclear reactor facility operation specified in Section 50.36 of 10 CFR Part 50.

DISTRIBUTION ELIGIBILITY: Utilities with construction permit or operating license applications, operating plants, contributing vendors and architect/engineering vendors. Internal distribution to branch chiefs and assistant directors of relevant NRC offices.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 67

DESCRIPTION: Application Survey of Utility Executives

An annual survey letter is sent to about 100 utilities, reactor vendors and architect/engineers asking for their plans to submit applications for nuclear power plant licenses to the NRC during the next two years. After all responses are received the results are summarized and copies are sent to all respondents.

DISTRIBUTION ELIGIBILITY: External distribution is limited to surveyed representatives of the appropriate companies. Internal distribution of survey results is made to the heads of all major NRC offices and the NRR divisions.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 91

DESCRIPTION: Revisions to the Standard Review Plan  
(NUREG-75/087)

This report provides guidance for staff reviewers in performing safety reviews of construction permit or operating license applications. It assures the uniformity of reviews and provides a data base from which to evaluate proposed changes.

DISTRIBUTION ELIGIBILITY: Limited to relevant NRC offices and contributing contractors.

COPIES NEEDED TO COMPLETE DISTRIBUTION: 724
