Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Eisenhut:

Enclosed are forty (40) copies of BAW-1623, "Control Rod Guide Tube Wear Measurement Program." This report documents the wear measurements taken in response to the NRC concerns addressed in a November 23, 1979 letter to the owners of B&W designed reactors. This information has previously been transmitted to the NRC as preliminary data on December 20, 1979 and February 13, 1980.

B&W believes that this concern is now closed. If you have any questions please contact Mr. John T. Willse on telephone number 384-5111 (Area Code 804), Ext. 2208.

Very truly yours

J. H. Taylor  
Manager, Licensing
