NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

TERA

June 16, 1980

Docket No. 50-213

Mr. W. G. Council, Vice President
Nuclear Engineering and Operations
Connecticut Yankee Atomic Power Company
Post Office Box 270
Hartford, Connecticut 06101

Dear Mr. Council:

We have completed our review of the information supplied by Connecticut Yankee Atomic Power Company in letters dated July 26, 1978, October 17, 1979, and April 23, 1980, concerning positive displacement pump vibrations for the Haddam Neck Plant. We have concluded that operation of your positive displacement metering pump will not cause fatigue failures in chemical volume control system piping because the pump is operated infrequently and because tests which have been run indicate that large amplitude vibrations do not exist in the system. We, therefore, consider this matter closed and require no further response from you.

A copy of our related Safety Evaluation is enclosed.

Sincerely,

A handwritten signature in cursive script, appearing to read "Gus C. Lainas".

Gus C. Lainas, Assistant Director
for Safety Assessment
Division of Licensing
