Inspection Summary: Inspection, irradiated fuel shipment, April 11, 1980 (Report 11-695/80-01)

Areas Inspected: Irradiated fuel shipment at the point of origin in the United States. The inspection included an examination of the general requirements for the transportation of irradiated fuel as well as the requirements for shipments of irradiated fuel by road. The inspection was performed during an off-shift period by one NRC regionally based inspector.

Results: Of the areas inspected, no apparent items of noncompliance were identified.
