Gentlemen:

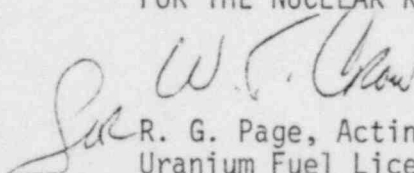

In accordance with your application dated January 9, 1980, and its supplement dated June 12, 1980, and pursuant to Title 10, Code of Federal Regulations, Part 70, Materials License No. SNM-1168 is hereby amended to authorize the following:

1. Revision of action level for airborne concentration of radioactivity in the fuel-rod-end welding area.
2. Revision of action level for liquid effluent release.
3. Revision of surface survey frequency for lunchroom and locker room areas.
4. Revision of interaction criteria between fuel assembly storage and shipping container loading areas.
5. Reorganization within the Safety, Licensing and Safeguards and Nuclear Materials Control Group.

Accordingly, the dates of January 9, and June 12, 1980, are added to Item 9 of your license.

All other conditions of this license shall remain the same.
