

May 14, 1980

Mr. Richard T. Kennedy, Commissioner
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Commissioner Kennedy:

I wish to have a copy of a lecture you delivered on March 27, before the Brown University Center for Energy Studies, in Providence, Rhode Island. The lecture was entitled "Availability of Primary Energy Resources and Technology".

In the lecture you referred to a Mitre Corporation Study of the capital requirements for the U.S. if the goal of 20% solar of our total energy demand were to be realized by the year 2000. I would like to have the specific reference to the Mitre Corporation study.

Thank you for your assistance in this matter.

Sincerely yours,

John J. Corrigan
Associate Dean
