NUCLEAR REGULATORY COMMISSION

REGULATORY GUIDE

Notice of Issuance and Availability

The Nuclear Regulatory Commission has issued a revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Revision 1 to Regulatory Guide 5.57, "Shipping and Receiving Control of Strategic Special Nuclear Material," describes procedures acceptable to the NRC staff for the protection of strategic special nuclear material during preparation for shipment, transfer between licensees, and receipt by a licensee. The guide was revised to incorporate recent changes to the Commission's physical protection regulations and reflects public comment and additional staff review.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Docketing and Service Branch.
