I wish to go on record - favoring an immediate issuance of a license to Plateau Resources for their uranium mill as the S. Fostering Canyon Uranium Project.

I also wish to add that I consider all these environmental statements as so much sheer nonsense. Old Joe Stalin of the USSR couldnt have dreamed up as good a device for destroying America as the EPA & the host of alphabet soup regulatory agencies such as yourselves.

I suggest the Nuclear Regulatory Commission be abolished & let free enterprise run its own show, at a tremendous savings to the Taxpayers.

Thank you

John Cochran
