TMI Room  
8th Street  
Washington, D.C. 20555

Dear Ms. Geiger:

As promised, we are forwarding herewith a copy of the Pennsylvania Emergency Management Agency action log covering the period March 28, 1979 through April 30, 1979. The enclosure is being provided for intra-agency use by the Nuclear Regulatory Commission and is not intended for public dissemination.

Very truly yours,

  
Oran K. Henderson  
Director

20	0727	Notified Operations Officer at 783-8150 of TMI report and notifications completed.	PEMA	Duty Officer	Acknowledged and advised he would take control.
21	0732	Agency Duty Officer Clarence R. Deller, Jr., concluded duty assignment and proceeded to EOC.			

## ACTION LOG

DATE March 28, 1979 PAGE 1 OF 11 PAGES

MSG NO.	TIME	PROBLEM (County-Subdivision)	ACTION AGENCY(S)	INFORMATION/ COORDINATION	COMPLETED ACTION
22	0732	Received call from the Duty Officer stating that he had received an emergency notification from Three Mile Island. A high level of radiation had been noted in Reactor Room No. 2. Reactor had been shut down. No off-site problems noted. The Duty Officer had not yet notified York County, PEMA Director and Central Area in the emergency call sequence. He was informed that the Operations Officer would take care of the notification.	PEMA	OPNS, Officer	Acknowledged - Informed York County Director, Central Area, rechecked with DER and Dauphin County.
23	0735	Call from Shift Supervisor, TMI, indicating change of alert status to general alert situation. Reactor had tripped because it "failed-to-fuel". Small off-site release reported in direction of 30 degrees.	PEMA	OPNS Officer	Acknowledged. Informed Shift Supervisor that initial alerting of affected counties completed. State Agency notifications next.
24	0736	Lamison advised that TMI had declared a "general emergency". The reactor had failed to fuel and a small off-site release experienced towards 30 degrees. He was in process of notifying DER, Dauphin, York and Lancaster. Requested Operations to obtain latest weather report from NWS and HIA. Winds reported light and variable.	Director

## ACTION LOG

DATE March 31, 1979PAGE 7 OF 14 PAGES

MSG NO.	TIME	PROBLEM (County-Subdivision)	ACTION AGENCY(S)	INFORMATION/ COORDINATION	COMPLETED ACTION
194	1518	Wind report at 1415 received from NWS, Harrisburg.	PEMA	Ops.	Info disseminated.
195	1520	Request information from Dauphin County concerning pregnant women leaving Hershey Center.	PEMA	Ops, Red Cross	Advised that five mile restriction still in effect.
196	1600	Received report on water sample - Harrisburg, Lancaster.	PEMA	Ops., DER	Info to DER.
	1630	Reviewed with Carl Kuehn, John Comey and Lamison EBS and NOAA radio systems.	Director		
	1630/1730	Met in Gov.'s Office and listened to report (telephone) from Chairman Hendrie, NRC; (1635 hours). Described efforts to manipulate bubble. Evacuation must be a consideration, clearly downwind on a quadrant. 20 mile evacuation based on broad weather patters. Prudent to continue present position towards pregnant women and pre-school aged children. Must continue evaluation. Conditions better today than before. No radical procedures contemplated. Increase capabilities with Feds. Discussed two critical points - only bubble discussion came through.	Director		
197	1640	Report from Dr. Ferrar, Public Utilities concerning TMI facility situation.	PEMA	Dir. & Dep. Dir.	Acknowledge and distributed to staff.

MSG NO.	TIME	PROBLEM (County-Subdivision)	ACTION AGENCY(S)	INFORMATION/ COORDINATION	COMPLETED ACTION
746	2210	Call from Molloy - Dauphin Co. - informed Molloy of the 5,000 piro-curie sample taken by DOE. He informed me that the Dauphin Co. Commissioners will probably hold a press conf. Monday morning.	PEMA	Ops	Informed Dick Lamison.
747	2220	Call from Gerusky - DER - DOE verified on a second sample their first report of 5,000 piro-curie readings. DOE & NRC are preparing to take additional samples and Gerusky expects to have results in several hours.	PEMA	Ops	Info.
748	2350	Call from Gerusky - DER - Denton, Kepler (NRC's new ops chief) and DOE called Gerusky and stated that the release was in a very narrow band. This was taken by aircraft sample. Critchlow told Gerusky that he was concerned that the Sec. of Health may ask that pregnant women and children again be told to leave the area. Gerusky said that iodine is no special danger to pregnant women.	PEMA	Ops	Info.
749	2350	Call from Gerusky - DER - Position Action Guide for iodine (DER Emergency Plan). He will wait for DOE's 11pm sample.	PEMA	Ops	Called Lamison. Called Molloy.

MSG NO.	TIME	PROBLEM (County-Subdivision)	ACTION AGENCY(S)	INFORMATION/ COORDINATION	COMPLETED ACTION
755	0750	Call from Gerusky. Disagreement in findings DOE/NRC by a factor of 10. DER lab to run readings.	PEMA	Cps	Noted.
756	0825	Gerusky called. DOE off by a factor of 60. EPA checked - DOE used incorrect factor.	PEMA	Ops	Notified Director, Deputy Dir. & Dauphin Co. Coord.
757	1055	Reilly called. TMI continues changing of oil filters. Some release - not a problem.	PEMA	Ops	Noted.
758	1651	Call for Col. Henderson from Governor's Secretary.	Duty Person		Col. H. not here. Duty person after office hours.
759	1652	Call for John Comey.	Duty Person		Comey not here. Duty person after office hours.
760	1750	Call for Col Henderson from Herb Hahn, DOE Command Post (Capitol City Airport). Asked for Col. Henderson's home number because only he could answer a brief question.	Duty Person		Gave him Col. Henderson's home

## ACTION LOG

DATE April 16, 1979 PAGE 1 OF 2 PAGES

MSG NO.	TIME	PROBLEM (County-Subdivision)	ACTION AGENCY(S)	INFORMATION/ COORDINATION	COMPLETED ACTION
750	0050	Call from Gerusky - DER - confirmed 2243 1/2 hr. sample for second time. NRC is confused over data and will obtain more samples.	PEMA	Ops	Hold until further info received. NRC (Kepler - 944-0791) will call Gerusky at home. Gerusky will call PEMA with findings.
751	0205	Call from Gerusky - DOE - running another sample now. Gerusky concerned, will call Kepler to see what has gone wrong.	PEMA	Ops	Gerusky will keep us informed.
752	0345	Call from Gerusky - DOE/NRC having differences of opinion. NRC finding DOE's readings to be 100 less than DOE's. Some activity on vegetation 10 miles east of plant - .5 and .7 nano curies per sq. meter. Winds 7.1 mph at 280°.	PEMA	Ops	May require all cattle within 10-mile radius to be contained inside and have re-scan of indiv. who have already been scanned.
753	0430	Call from Gerusky - at 0340 DOE reported 5.3 mc taken at 0227 hrs. The high sample was taken to NRC who found it to be lower by a factor of 20. DOE's finding is 2 times the available level. Concern is that iodine may be from another source than normal bent. Officials checking this out.	PEMA	Ops	Gerusky will inform us of Rad. Mgt. Corp. readings. He will make a decision whether or not to call in additional personnel to activate DER lab.
754	0650	Call from Gerusky - reported that both NRC and Rad. Mgt. Corp. rechecked DOE high sample and found it to be lower than DOE reported by a factor of 10. Now DER and a firm called SAI will check to see what they find.	PEMA	Ops	Gerusky or Reilly will call w/ results.
