

## METROPOLITAN EDISON COMPANY

Subsidiary of General Public Utilities Corporation

Subject NRC/TMI Special Inquiry Group  
August 13, 1979 Request

Location Three Mile Island

To Matias F. Travieso-Diaz

Date August 22, 1979

Items III.2(a), III.3(a), III.4(a) and III.5(a) of the NRC/TMI Special Inquiry Group's request for information dated August 13, 1979, ask for recordings of the bus continuous voltage, current and power for buses 2-3, 2-4, 2-1E and 2-2E for March 28, 1979. Please be advised that no recordings are normally made of those parameters for the referenced buses and to the best of our knowledge none were made on March 28, 1979.

Similarly, Item III.1(b) asks for recordings of continuous voltage, current and instantaneous power for March 28, 1979, for auxiliary transformers 2A and 2B. Again, no recordings of such parameters for the secondary side of those transformers are normally made and to the best of our knowledge none were made on March 28, 1979. The same situation exists with respect to the primary current and power of those transformers.
