Dr. Joseph Hendrie, Chairman
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Dr. Hendrie:

This is to urge you to decide against the expansion of the spent nuclear fuel dump at Zion, Illinois.

So long as there is no safe method of treating spent nuclear fuel, increasing the capacity of the dump represents a hazard to all the cities in the vicinity and especially to Lake Michigan. The danger would be vastly increased by an accident at the Zion nuclear plant or by a natural catastrophe affecting the area.

Please do not vote to create a radioactive dump in our backyard.

Very truly yours,

Rose E. Gogol
(Mrs.) Rose E. Gogol
