Glenside, PA 19038

Dear Mrs. Seraphin:

This is in reply to your letter of August 27, 1979 regarding the licensing of nuclear power plants by the Nuclear Regulatory Commission.

The Nuclear Regulatory Commission has requested that no operating license, construction permit or limited work authorization be issued without prior approval of the Commission.

The Commission has also requested that the staff forward to all construction-permit and operating-license applicants for planning and guidance purposes the list of items related to the Three Mile Island accident from the Lessons Learned Task Force and in various NRC Bulletins and Orders, advising the applicants that the list is not complete and will be updated as new information becomes available. The Commission has stated that the staff should continue to review on an on-going basis those areas not related to the Three Mile Island accident.

As a practical matter, some time will be required before licensing activities and proceedings can be completed on pending cases and before any licensing decision can be made. In any event, we assure you that every effort is being made to ensure the continued protection of the public health and safety at all nuclear plants that are currently operating or that may begin operation in the future.

Sincerely,

Harold R. Denton, Director  
Office of Nuclear Reactor Regulation

Washington, D. C. 20555

Dear Sir:

It is an outrage that you and your commission have decided to resume licensing for new nuclear facilities.

You and they are helping to sign death warrants for us, our children and their children. God gave this beautiful planet to all men, not to the power companies.

I hope that when we have been successful in shutting down these monsters, we can put men like you on trial for what you are doing.

Very, truly yours,

*Handwritten signature*
