Time (4)

I am writing to protest your rush to reopen & license power plants without regard for public safety or welfare.

You are ignoring us - the public and regarding your own welfare & POWER. You are burning your own bridges because your lives are at stake along with the rest of us. You, too, are exposed to radiation leaks & accidents.

Close the nuclear power plants and do not issue any new licenses!

So life - yours, mine & our children

Roseanne Kuiper
