Mr. Melvin A. Monson  
Branch of Permits  
Division of River Basin Studies  
Bureau of Sport Fisheries and  
Wildlife  
Department of the Interior  
Washington, D. C. 20242

Dear Mr. Monson:

In accordance with the understandings which were reflected in Secretary UHall's letter of March 20, 1964 to Chairman Seaborg, I am forwarding herewith Volumes I and II of the Oconee Nuclear Station Preliminary Safety Analysis Report, filed by Duke Power Company for the proposed construction and operation of a two-unit nuclear power plant at its Oconee Nuclear Station located in eastern Oconee County, approximately eight miles northeast of Seneca, South Carolina. The reactors are designed for initial operation at 2452 thermal megawatts with a net electrical output of approximately 839 megawatts.

We would appreciate receiving a report from the Fish and Wildlife Service concerning those features of the proposed reactor operation which might have radiological effects on fish and shellfish.

On the basis of our tentative schedule for this project, it would be helpful to have your report available for our use by March 1, 1967.

Sincerely yours,

Original signed by  
E. G. Case

Edison G. Case, Deputy Director  
Division of Reactor Licensing

Enclosures:  
As stated above
