Gentlemen:

This refers to the inspection conducted by Mr. T. N. Epps of this office on February 3-6 and 10-13, 1976, of activities authorized by NRC Operating License Nos. DPR-38, DPR-47 and DPR-55 for the Oconee 1, 2 and 3 facilities, and to the discussion of our findings held with Mr. J. E. Smith at the conclusion of the inspection.

Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector.

We have also examined actions you have taken with regard to previously identified enforcement matters and unresolved items. The status of these items is identified in Sections II and IV of the summary of the enclosed report.

Two new unresolved items resulted from this inspection and are identified in Section III of the summary of the enclosed report. These items will be examined during subsequent inspections.

During the inspection, it was found that certain activities under your license appear to be in noncompliance with NRC requirements. These items and references to pertinent requirements are listed in Section I of the summary of the enclosed report.
