of Reactor Licensing

B&W TOPICAL REPORTS - PRELIMINARY RT COMMENTS FOR OCONEE REVIEW

Based on the Oconee review plan, approved August 8, 1969, and subsequent DRL level meetings on vendor topicals, Reactor Technology has accepted responsibility for review of several B&W topical reports to the extent necessary to complete the Oconee POL review. You have provided a preliminary review on most of these topicals, however, to meet our present schedule of completing our report to the ACRS in April, we need the results of your preliminary review on the following outstanding topicals as soon as possible but not later than February 16, 1970.

BAW-10001- InCore Instrumentation Test Program
BAW-100010, Part 1 - Stability Margin for Xenon Oscillations -
Modal Analysis
