N. C. Moseley, Director, Region II

ENCLOSED LICENSEE EVENT REPORT PRINTOUTS

The enclosed data on Oconee and Zion is furnished for backup in your preparation for the Browns Ferry Hearing. I should point out that there are seven separate printouts. The very thin one on top comprises all the data we have available on construction deficiency reports from the two sites. Following that, there are three sets of printouts combining the two facilities for the '69 through '74 data file and the '75 to date data file. The data included in the three sets is the same but they have been sorted different ways as indicated by the titles and the headers on each of the printouts.

If you have any questions on these, please do not hesitate to contact me.
