DAVIS BESSE  
SEPT 24, 1977

Office of Nuclear Reactor Regulations  
The Nuclear Regulatory Commission  
Washington, D.C.

Dear Sir:

RE: NUREG-0337, Draft Environmental Statement  
*Enc:* related to the construction of Erie Nuclear  
Plant, Units 1 and 2; Ohio Edison, et al.  
Dockets Nos. STN50-580, STN50-581.

As formal participants in intervention proceedings before the Ohio Power Siting Commission in regard to an aspect of the above mentioned proposed facility, the Firelands Coalition for Safe Energy, Inc., would appreciate receiving a copy of the above report. We also renew our request for the final report concerning the brief shutdown of Toledo Edison's Davis-Besse facility following a failure of one of the release valves.

As one of our trustees previously reserved a five-minute appearance before the NRC in regard to the Erie application, it would be most helpful if the NRC sent a copy of the report at its earliest convenience.

Thank you for your continued assistance.

Sincerely,

*Wm. F. Vartorella*

Wm. F. Vartorella, Ph.D.  
Trustee and Spokesperson  
Firelands Coalition for  
Safe Energy, Inc.
