RES REVIEW OF VENDOR R & D

In a telephone discussion with Gary Bennett, Chief, Research Support Branch, he indicated the primary purpose of reviewing Vendor R & D was to ensure that RES was not duplicating their research activities. The meetings at the vendors' facilities are well represented by NRR. The discussions are primarily related to licensing issues and vendor improvements to increase plant availability on line. RES prepares the meeting summaries which are widely distributed. Dr. Bennett did not recall any follow-up activities by RES or any discussions on B&W R & D which was pertinent to TMI-2 accident.
