

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

July 3, 1979

Mr. Sanford Berg
Executive Director
Public Utilities Research Center
College of Business
University of Florida
Gainesville, Florida 32611

Dear Mr. Berg:

Enclosed you will find the information requested regarding utilities operating, building, or planning to build nuclear units with Babcock and Wilcox nuclear steam supply systems (reactors).

Although numerous utilities may own interests in a nuclear unit, the list enclosed has been simplified to identify only the lead licensee. For example, Three Mile Island Unit 2 is divided between the three General Public Utilities Company subsidiaries: Metropolitan Edison Company (50%), Pennsylvania Electric Company (25%), and Jersey Central Power and Light Company (25%).

It is my understanding that your study seeks to identify the financial impact of Three Mile Island on all utilities owning B&W units. Therefore, it is possible that you will want the listing of these minor owners I have described above. If so, please contact me again. That information is available but involves more research; if important to your study it can be compiled.

To add one further note of caution I will repeat what I noted on the telephone: some utilities own different types of reactors at the same site. For example, Arkansas Nuclear One, Unit 1 is, as shown on the list, a B&W plant but Unit 2 is a Combustion Engineering reactor. This might make evaluation of financial impact on B&W utilities somewhat more complicated.

I hope this information has been helpful. Again, if more specificity is
