

July 16, 1979

Note to: Walter Haass, NRR

Pursuant to our discussions of approximately one month ago, enclosed you will find a copy of a recent letter Mitchell Rogovin, Director of the NRC/TMI Special Inquiry Group, sent to Metropolitan Edison Company.

As you will recall, we intended to -- and have -- requested information on utility management and technical qualification which in many ways parallel the request which Lessons Learned sent to all operating licensees on June 20. Specifically, I direct your attention to requests 5, 9, and 17 in the Rogovin letter.

It is my hope that if you receive a timely response from Metropolitan Edison Company to your June 20 request you will inform this Special Inquiry. This would enable us to integrate the information into our investigation on the immediate question of the technical qualification of Met Ed.

If you would like further information, please do not hesitate to contact me at x-28947.
