August 30, 1974

Mr. Paul F. Collins
Chief, Operator Licensing Branch
U. S. Atomic Energy Commission
Washington, D. C. 20545

Dear Mr. Collins:

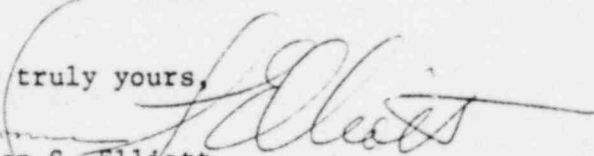

In reference to our recent conversation with respect to the conduct of the reactor operator's certification examination on the Babcock & Wilcox simulator, we will be conducting a training program for the Duke Power Company Oconee station during September, 1974 which will include at least that amount of instruction as described in my letter 9 H (14) AEC 1-74 dated August 30, 1974.

It is my understanding that the Duke Power Company will submit to you a description of the total training program for these operators who will be in our September class.

The reactor startup examinations for the Duke operators will be given on Friday, September 13 and September 27, 1974. Your attendance for observation or participation in these examinations would be welcomed.

The Duke Power Company plans to provide a management representative to observe the conduct of examinations on both dates shown.

Very truly yours,

Norman S. Elliott
Manager, Nuclear Training
