HRAL:

I may not have adequately briefed you on the results of the Lynchburg meeting in one area.

1. M.R. indicated that we need to have the evaluation of our operator licensing requirements. That I believe you are doing. Also, there are several staff papers sent to the Commission. And you will have to interview Paul Collins & others.
2. M.R., in this regard, wanted someone to check with the Airline Pilots Association for a comparative evaluation summary of pilots' qualifications, training, pay etc. He asked Bernie Doyle to do this.
3. M.R. also asked if it is conceivable that Met Ed would not know (presumably as a result of their own initiative, industry publicity, or NRC actions) whether there were other utilities who were ahead and shoulders above them

8001220752 P

the area of operator tray, tech
quals, control room design etc.

It certainly is conceivable to me
that there isn't any common
awareness in the industry on
such matters. I assume that
you on the Sub. Tech Group (Chymin)
is looking into this kind of thing.

Bill Paul
