FROM: G. Knighton, Chief, Environmental Evaluation Branch, DOR
SUBJECT: THREE MILE ISLAND SITE REVISED EMERGENCY PLAN

PLANT NAME: Three Mile Island Nuclear Station Unit 2
DOCKET NUMBER: 50-320
PROJECT MANAGER: G. Zwetzig
TAG NUMBER: 10082

With a cover letter to S. A. Varga, NRC, dated May 11, 1978, the Metropolitan Edison Company submitted Amendment No. 65 to the Final Safety Analysis Report for Three Mile Island Nuclear Station Unit 2. The document consists of a revised Emergency Plan for the Three Mile Island site.

We have reviewed the subject document and find that it does not conform to the staff position as stated in Regulatory Guide 1.101, Revision 1, and it is not acceptable. The licensee should be instructed to revise the submittal to conform to Regulatory Guide 1.101, Revision 1, and, in the interim, to abide by the provisions of the Emergency Plan previously approved as stated in the Safety Evaluation Report for Three Mile Island Unit 2 dated September 1976.

The attached report describes the deficiencies of the revised Emergency Plan.
