Mr. Joseph M. Hendrie
1717 H Street NW
Bethesda, Md. 20555

Dear Mr. Hendrie,

Since the onset of "Three Mile Island" I have become very interested in Nuclear Reactors. Could you please send me any information and/or progress on what is being done to prevent any type of the problems that occurred in Pennsylvania? I would also appreciate any type of newsletter or update that is being sent to the local Bessie-Davis Plant in Port Clinton Ohio. I, of course, realize The Nuclear Regulatory Commission is still investigating what happened and why this happened and the possibility of this ever happening again but would still request any new or updated information.

Thank you for your time,

Mr. Hedrick Fulk
