Mr. Harold Denton
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

I am writing you about an accident at Three Mile Island. I live in Middletown, Pa. I live about 10 miles away from the plant.

I think nuclear energy may be necessary, but the accident endangered the way my life and a lot of other people's lives will be in the future.

The people that live near the plant may not be able to live there for a while and I don't have a job nor a place to go. I also don't think the government should be responsible for an accident that could have been prevented.

Thank you,
Linda S. Sidel
