Nuclear Reactor Regulation Office
1717 H Street, N.W.
Washington, D.C. 20555

Attention: Mr. Harold R. Denton, Director

Dear Mr. Denton:

On November 5, 1979, the Nuclear Regulatory Commission decided to stop issuing construction permits and operating licenses for nuclear power plants.

Since our nation is in such a traumatic energy crisis and the utility companies are exerting the voluntary efforts toward safe plant operations, we feel that the above ruling should be reversed. Any influence that your office can apply to such reversal will be most appreciated.

Very truly yours,

R & K ENGINEERING & SALES CORP.
