Nuclear Reactor Regulation Office  
1717 H. Street, N.W.  
Washington, D.C. 20555

Attention: Mr. Harold R. Denton, Director

Gentlemen:

This correspondence is a request for you to consider your decision to stop issuing construction permits and operating licenses for Nuclear Power Plants. We should learn from the experience at Three Mile Island and use that experience for the continued operations of the Nuclear Industry. However, this moratorium on permits seems to be very re-actionary and poorly timed in view of our current energy situation.

I, therefore, request that you re-consider this action that the NRC has taken.

Very truly yours,

*Handwritten signature: David W. Earle -*
