POOR ORIGINAL

Nuclear Regulatory Commission
1717 H. Street, N. W.
Washington, D.C. 20555

Attn: H. R. Denton

The November 5, 1979, N.C.R. decision to freeze permits and licenses on nuclear power plants is completely ridiculous! Any form of energy is dangerous. Many lives are lost each day in the oil business. In a democracy, the majority rules and it's about time we begin to listen to the majority rather than a few radicals.

Please use some common sense and let's get on with the nuclear power plants that we need.
