

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

JAN 9 1980

Mr. R. L. Crawford  
P. O. Box 175  
Smithland, Kentucky 42081

Dear Mr. Crawford:

Your letter of August 27, 1979, to the Secretary of the Nuclear Regulatory Commission spoke of the delay to the nuclear program caused by the Three Mile Island accident.

The Nuclear Regulatory Commission is committed to protect the public health and safety. The Three Mile Island accident resulted in a need for changes in the approach to safety. The Nuclear Regulatory Commission has found that actions recommended by its own staff and by the President's Commission on the Accident at Three Mile Island in the areas of human factors, operational safety, emergency planning, nuclear power plant design and siting, health effects, and public information are necessary and feasible.

At this time we are preparing for review and approval by the Nuclear Regulatory Commission an Action Plan that will specify the precise actions to be taken. This Action Plan will include new or improved safety objectives, detailed criteria for their implementation, and various implementation deadlines. Our goal is to have approved NRC requirements available to all utilities shortly after February 15, 1980.

It is recognized that there will be a significant effect on the availability of power generating capacity if those plants now in the final stages of construction do not receive operating licenses by the dates previously anticipated, and every effort is being made to avoid unnecessary delays.

Sincerely,

A handwritten signature in cursive script that reads "Harold R. Denton".

Harold R. Denton, Director  
Office of Nuclear Reactor Regulation
