MEMORANDUM TO:  E. Kevin Cornell  
FROM: Mitchell Rogovin  
SUBJECT: ITEMS FOR FOLLOWUP

At the August public hearings of the Kemeny Commission a number of items that we have been working on were highlighted. I want to make sure we are following up on them:

1. The Denton-Kennedy testimony highlights the procedural posture of the NRC i.e., that the 5 Commissioners are not publicly perceived as being in charge. The public announcement to resume licensing of reactors came from the Director of NRR, not the Commission. *Bonnie*
2. The Taylor-Denton colloque on safety. *?*
3. LaFleur's testimony on Beznau and the lack of a requirement on vendor's to notify NRC of any accident. LaFleur was to send us materials supporting his view that any agreements with foreign countries is better than none even if they put a veil of secrecy around public reporting. *= Parker*
4. Creswell's testimony regarding the handling of his dissent. *#1 Parker*

These are all significant points and I hope they are not list in the moving about.
