Dear Dr. Denton

Please, please, decommission both Three Mile Island Nuclear Plants. This area has assumed both the physical and mental risks of this accident and will also essentially be responsible for the financial burden as well. We should not be asked to accept this grave responsibility over again or to be expected to deal with any additional emotional factors involved if the Nuclear plants were operating again.

It is for my children's sake that I am concerned. We would all give up so much if necessary. Please help us.

Sincerely,
Mrs. Edgar J. Lay
