Chairman Hendrie

Sir,

We are absolutely convinced that the Metropolitan Edison Company should no longer be licensed to operate any nuclear facility. If this utility continues to operate, we are just hostages whose lives can be held for ransom by terrorists at any time.

We unequivocally oppose any release of radioactive waste water from Three Mile Island into the Susquehanna River. We have no reason whatsoever to believe that we will be dealt with truthfully as to whether this water will be safe for release into our environment.

We are sure of one thing only; our best interests have been sacrificed to the best interests of the nuclear industry and to all those who profit from it in any way.

Sincerely yours,
Charles L. and
Sue Hocher

REC'D CHAIRMAN
