Dr. Joseph M. Hendrie
Chairman
Nuclear Regulatory Commission
Washington, D.C.

Dear Mr. Hendrie:

In the past few weeks the United States has had a great scare from the radiation from the Nuclear bubble in the Three Mile Island Nuclear Plant. I would like to ask a few questions about it. Please answer as clearly as possible.

1. Are we safe with radiation?
2. How long do we have to fear radiation?
3. Is the food we eat safe?

Sincerely
Michele Pacifico
