I want T.M.I. closed,
shut down, and never to
operate again.

Our futures are
clouded, my children's futures
are at stake. I want my
children to remember good
things about their years
growing up in this area, but
at this rate they won't.
I can remember when Mike
stand as a farm that
grew melons, and tomatoes
and other vegetables. Of summer
in an unpolluted water. Spending
weekends at my parents cabin just
across from T.M.I. water skiing
those are good memories
all is gone now,

POOR ORIGINAL

progress moved in I can
only look at photos of days
gone by, and can remember
I want T.M.I. to only
exist in photos, and the
memory of March 30, be
a reminder of what almost
took everything we have and
the threat to our lives.
Let's look for other
means of generating electricity,
there's the sun, wind and
water. What about them?
Close T.M.I. forever

S. Bradley
