Dear Mr. Bradtmiller:

Your letter of December 21, 1979, was referred to me for response. At the present time, the NRC staff is preparing an Environmental Assessment which will discuss the various methods available for disposition of the krypton gas within the TMI-2 Containment Building. We expect to present this assessment to the NRC Commissioners by the end of January 1980. At that time, copies will be made available for public review and comment. We will see that a copy is sent to you at that time.

Sincerely,

John T. Collins
