U.S Nuclear Regulatory Commission
Washington D.C. 20555

Dear Sir:

I think that what happened at TMI was a fault of the workers of TMI. And what happened or will happen should not be paid for by the people they are receiving power from any businesses connected with Med Ed power plant.

I don't think that all the facts were given to the people in a 20 mile radius. I'm not saying that I disagree with nuclear power plants. I think that they should have better safety precautions, and a better place to be built. Not to
