Mr. Joseph M. Hendric
United States Nuclear Regulatory Commission
Washington, D. C. 20055

Dear Sir:

On the basis of your records prior to the Three Mile
incident, has the Commission evaluated the relative
merits of the two systems - once through system vs.
the U-tube system - being used at the present time
by the utility industry.

I would appreciate a prompt reply.

Sincerely,

8002150
