Dear Sir,

I would like for you to answer some of my questions about 3 mile Island. What is your own opinion about what caused this accident in Harrisburg? What are the chances of 3 mile Island and the surrounding areas to ever be the same as before? Do you think that all these marches will effect the nuclear plants in the United States, The World? Do you think that the owner will have to close down the plant to run some extra safety actions? What safety standards do you think the President will pass into the law for nuclear plants since this accident? Could you please send me some materials, drawings and diagrams about nuclear power and nuclear plants such as 3 mile Island.
