

June 7, 1979

Note To: Dave Gamble, NRC/TMI Special Investigating  
Group

From: Lana Cobb, IE

I have prepared the following report per our discussion:

1. Activity For Selected Dockets Fy74 & 75. This report includes all activity for the three dockets which you requested for the period of July 1, 1973 thru June 30, 1975. (by docket/report)
2. Reactor Activity July 1, 1975 to Present. I have included all activity (new format) and the text for each item of noncompliance or deviation. (Noncompliance indicated by an "a" under the heading type and deviation indicated by a "c" under the heading type.

Any text with an "s" under heading Ex indicates 2.790 information and should be handled as such.

Please note-- module numbers do not appear with the text until late 1977. At that time we started recording this information with the text.

3. Activity For Selected Dockets 7/75 - Todate. I have listed each inspection and included the module number with a description of the module inspected. This will help determine the area inspected. Use this report with report # 2.

I have left the program on each report for reference. I will prepare the other docket in the same format as these three reports.

If you have questions , please call me on ex. 27246.
