The Honorable John Heinz, United States Senate  
Washington D.C. 20510

Dear Senator Heinz:

As a class project we are to write letters to people in public office. The following are some questions I would like answers if you have time.

What is being done about the Nuclear Power Plant at Three Mile Island? Is there any way that they can stop the accumulation of the waste material? Will the process of cleaning up the waste work? How safe is the water that is to be dumped into the Susquehanna River? Is a melt down still a possibility?

Thank you.

Sincerely,

*James F. Ulrich*
