Gentlemen:

Subject: Combined Inspection 50-289/79-03 and 50-320/79-04

This refers to your letter dated August 29, 1979, in response to our letter dated April 23, 1979.

Thank you for informing us of the corrective and preventive actions documented in your letter. These actions will be examined during subsequent inspections of your licensed program.

We were informed during a review of these items onsite on October 9, 1979, by Mr. Plumlee, of this office, that you have revised and reissued the procedures for high radiation area work, and these changes have been implemented.

We will review your plans to improve the control of neutron radiation levels in Unit 2 at such time as this becomes appropriate.

Your cooperation with us is appreciated.

Sincerely,

Boyce H. Grier
